

WELCOME TO BOSCOBEL'S REIMAGINED FORMAL GARDEN

Boscobel has replanted this garden with species native to the Hudson Valley and those popular in early American gardens. The new plants were selected to thrive in our site conditions, bloom for long stretches of the season, and be friendly to birds and other pollinators. They provide a link to the past, enliven the visitor experience, and reflect Boscobel's goals for environmental sustainability.

Thank you for growing with us and our gardens.

SOME OF THE PLANTS YOU SEE TAKING ROOT HERE:
